

Infopipe®

Federal BLM Data with Shape Files

An Infopipe subscription gives you **Federal BLM Data as Shape Files ON YOUR GRID**. We use your **PLSS grid** to produce your shape files **EVERY MONTH**.

The basic data is processed at Infopipe to meet your requirements. For example, Lease, Expiring, HBP, Units, Transfer of Operating Rights, significant partners, and competitor's polygons can be supplied.

We can limit processing to your areas of interest or process data for an entire state.

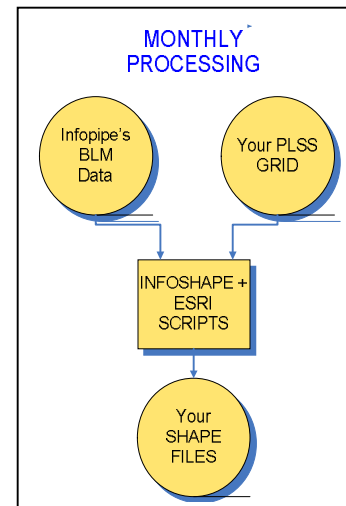

TWO FORMATS ARE AVAILABLE: Infopipe & Primitive Display Simple and Basic (PDSB)

The Infopipe format is designed for serious analysis. The Infopipe format has 41 fields for maximum query capability making it easier to query multiple owners and stipulations.

The PDSB format has only 26 fields with 35% less information than the Infopipe format. The PDSB format is designed for the quick-and-dirty look similar to what competitors supply.

Both formats may be processed to meet your needs and each have embedded **URL's to Infopipe's Serial Register pages**. Our **NEW INFOSHAPE** system is compatible with both formats.

You can have both formats with your subscription!

Subscriptions offer the following advantages **at no additional charge**:

- Monthly information shape files on your grid.
- Processed information shape files customized to your requirements.
- Information query tool and databases to output spreadsheets/databases.
- Lot-replacement tool which replaces lots and tracts with aliquots.
- Access to our website for lots-tracts and Serial Register Page research.
- Telephone and Remote Web Support.

Ask about our competitive upgrade pricing. State data is available at additional charge
